

# MUHAMMAD IHYA 'ULUMUDDIN

Backend & Full Stack Software Engineer

Indramayu, West Java, Indonesia

## About me

Backend & Full Stack Software Engineer with hands-on experience developing payment and financial platforms in a production environment. Experienced in building RESTful APIs and backend services using Go and Node.js, with strong capabilities in PostgreSQL, Redis, database optimization, and full-stack web development using React and Next.js. Completed a six-month internship at PT Aplikasi Dagang Teknologi, contributing to PPOB and financial product development, including affiliate commission systems, caching, and database optimization. Interested in building reliable, scalable, and maintainable software systems.

## Technical Skills

- Backend: Go, Gin, Node.js, Express.js, Laravel, RESTful API
- Database: PostgreSQL, MySQL, Redis, Advanced SQL, BigQuery, Sequelize ORM
- Frontend: React.js, Next.js, TypeScript
- Cloud & Infrastructure: Docker, AWS S3, Azure Functions, CI/CD
- AI & Data: Python, scikit-learn, OpenCV, Machine Learning, Feature Engineering, Data Visualization, Geospatial Analysis
- Engineering: Database Design, Query Optimization, API Development, Scalable Services, Clean Code

## Experience

### PT Aplikasi Dagang Teknologi — Magang Programmer Intern | Jan 2026 – Jun 2026

- Developed and maintained payment and financial product features for a Payment Point Online Bank (PPOB) platform using Node.js, PostgreSQL, Redis, and related backend technologies.
- Implemented a 5-level affiliate commission system using PostgreSQL recursive CTE with anti-fraud hard-cap logic.
- Optimized backend performance through Redis caching and PostgreSQL query optimization.
- Collaborated with frontend and backend engineering teams across React and Go-based services in a cross-functional development environment.
- Contributed to the development of production-oriented payment and financial platform features.

## Project

UangKu — Family Finance Management

- Go · Gin · PostgreSQL · React.js · Node.js

Payment Point Online Bank (PPOB)

- Node.js · Express.js · PostgreSQL · Redis · Sequelize

FoodDash — Food Delivery Application

- Laravel · PHP · MySQL · Midtrans

AI-Based Mango Freshness Analysis

- Python · scikit-learn · Random Forest · OpenCV

## Education

Politeknik Negeri Indramayu - S1 Terapan Rekayasa Perangkat Lunak  
2023 – 2027

## Leadership & Organization

HIMARPL — Politeknik Negeri Indramayu

Head Organizer — P3M Community Program

Jun 2025 - Led a student community service program and coordinated logistics, volunteers, and event execution.

External Relations Secretary

Oct 2024 – Feb 2025

BEM Politeknik Negeri Indramayu — Kabinet

Narayana

Junior Staff — Internal Relations

Jun 2023 – Jun 2024
